

Environmental Policy

TAKING LOCAL BUSINESS FURTHER

FullForce Logistics take seriously the need to monitor and address our operation's impact on the environment. We are committed to reducing or minimising its effect through corporate responsibility.

FullForce has established an Environmental Policy:

- We will strive to maximise the efficient use of all carbon fuels and minimise emissions, by the effective use, engineering and correct maintenance of our vehicles and buildings.
- We will use, where viable, recyclable products and encourage the recycling of materials and waste.
- All new buildings will implement environmental savings wherever possible and existing buildings will be assessed for opportunities.
